Joseph Wu (吳信諺)

UI/UX Designer · B2B SaaS

Taipei, Taiwan · j78428@gmail.com · j78428.github.io/portfolio · linkedin.com/in/joseph-wu-9026b375

SUMMARY

UI/UX designer with 10+ years of experience designing B2B SaaS products, WebApps and enterprise management systems, plus B2C booking platforms. I turn complex, multi-role systems into clear products by defining the problem, structuring information architecture and building design systems. Experienced across data analytics, manufacturing, IoT, education, travel and finance; former design team lead of 2–3 designers, and comfortable building with HTML/CSS.

EXPERIENCE

UI/UX Designer — 好學教育

Oct 2023 – Jan 2026 · Taipei, Taiwan

Sole designer for Tuoyoujia (托幼加), a childcare-management SaaS with a web admin and WeChat mini programs for teachers and parents. Worked with one PM in Taiwan and an engineering team in China.

- Led the 1.0 → 2.0 redesign when the company moved to a platform strategy; the new system replaced 1.0 for existing customers and is used by about 40 childcare centers.
- Audited existing features and interviewed directors at 5–6 centers with the PM to redefine feature categories, information architecture and role boundaries.
- Restructured the product into three back offices (platform, institution, single center) and treated both company-owned and external centers as platform customers, which simplified permissions.
- Designed role-based dashboards: one overview plus dashboards for school admins, classes, teachers and medical staff, fitting China's specialised staffing while still serving Taiwan centers.
- Designed teacher and parent mini programs by ranking features on frequency × daily importance, and linked parent requests (handovers, leave, medication) to teacher confirmation. Feedback showed users rarely got lost looking for features.
- Designed course licensing and scheduling and batch student changes; delivered annotated specs and design reviews to the remote engineering team.
- Contributed system proposals for partner projects, data migration and a baby sleep-monitoring system.

Senior UX Designer — Trend Micro

Apr 2023 – Sep 2023

- Clarified requirements and communicated design concepts with product managers, UX researchers, technical writers, visual designers and developers.
- Designed end-to-end user flows, wireframes, UI and prototypes across multiple applications and services.

UI/UX Designer & Design Team Lead — Synergies

Aug 2019 – Apr 2023

- Led product design for JarviX, an analytics SaaS that turns natural-language questions into charts, from 0-to-1 through ongoing releases.
- Raised adoption of smart analytics: surveyed users and interviewed low-usage enterprise customers, then redesigned page hierarchy, staged onboarding, query suggestions and a next-step recommendation feature.
- Rebuilt the design system (atomic components, complete state definitions, a two-layer color system ready for light and dark themes) and a component library with front-end engineers.
- Led a design team of 2–3: set collaboration process, trained designers, reviewed output quality and ran regular sharing sessions.
- Designed systems across industries: procurement recommendation for a global auto-glass maker, yield prediction for an LED packaging plant, AML transaction review for a Taiwanese financial holding company, and smart production scheduling.

UI/UX Instructor — Reborn Academy

Aug 2020 – Oct 2021

- Created courses, taught live classes and ran UX workshops; mentored students on projects and portfolios, and was voted most popular mentor.
- Led the instructor team and joined academy operations planning to integrate online and offline courses.

UI/UX Designer — 區塊科技 Apr 2019 – Jul 2019

- Designed products for a blockchain-based digital evidence service: company website, user management platform, campaign site and Chrome extension.
- Defined requirements and flows, designed UI, and built HTML/CSS with front-end engineers.

Web Designer — 福泰旅行社 Oct 2013 – Nov 2018

- Owned 10+ systems end to end, from feature planning, user interviews and feedback to UI, including B2C hotel booking and ticketing platforms and internal product, member and order management systems.
- Redesigned the company website, consolidating separate sales sites under one navigation structure and visual style.
- Built front ends in HTML/CSS and worked with engineers on implementation.

EDUCATION & TRAINING

- **St. John's University (聖約翰科技大學)** — Department of Electronic Engineering, 2007–2011
- **IDEO — Human-Centered Design** — Applied human-centered design to issues facing older adults: interviews, problem definition, ideation and low-fidelity prototyping
- **王健設計學院** — Visual Communication Design Program, 2015–2016
- **Chinese Culture University, School of Continuing Education (文化大學進修推廣部)** — Visual Communication Design Program, 2014
- **Bureau of Employment and Vocational Training (職業訓練局)** — Web Programming Program, 2013

SKILLS

- **UX:** problem definition, user interviews and surveys, information architecture, user flows, wireframing, prototyping, usability validation
- **UI:** interaction design, design systems, visual design, data-heavy dashboards
- **Tools:** Figma, Sketch, Zeplin, Miro, Axure, Photoshop, Illustrator
- **Front-end:** HTML, CSS, Bootstrap
- **Languages:** Mandarin (native)
